

Alpiq Holding Ltd.

www.alpiq.com

Alpiq Holding Ltd. is a leading energy company based in Switzerland and active across Europe. Alpiq generates and transports electricity and is engaged in electricity trading and sales. Their Energy Services division also provides all of the technical services related to the generation, transmission and application of energy. By using Alpiq's solutions, their customers are provided a competitive edge that allows them to achieve sustained success.

Alpiq Holding uses BIRT reports in a number of applications. For instance, in its Triple Point Commodity XL for Credit Risk application – provided by Triple Point Company as part of its service to Alpiq in commodity trading – Alpiq helped define a series of customized reports to provide snapshots of daily financial transactions and overall trading activities. The customized reports are utilized by Alpiq's business users, including risk managers, traders and margining assistants. BIRT is also used in an IBM Maximo Version 7 application, where BIRT provides reports based on Maximo data for employees in Alpiq's power plant.
