

BIRT Resources for AssetWorks and AiM

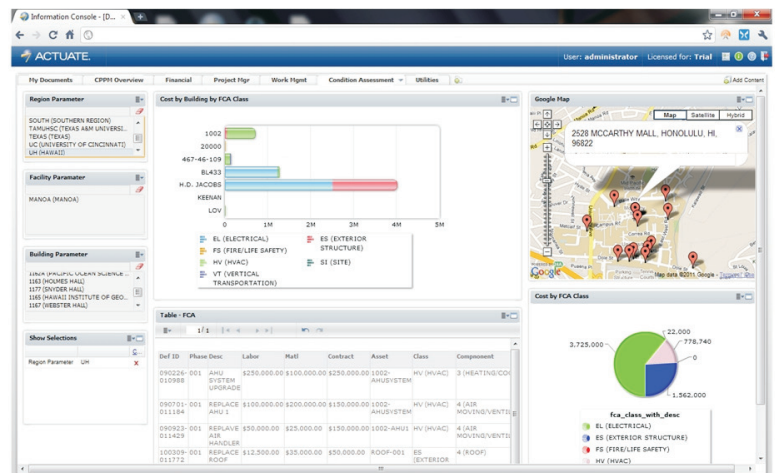

Resources Sheet

BIRT (Business Intelligence and Reporting Tools) is a top-level Eclipse project and a modern open source data visualization technology. BIRT has been downloaded more than 10 million times to date, making it the open source Business Intelligence offering with the most momentum.

Actuate—the people behind BIRT—initiated and co-leads the open source Eclipse™ BIRT project, and provides value-added products to maximize BIRT implementations.

AssetWorks' AiM™ software—an industry-leading Enterprise Asset Management (EAM) software solution—is now embedded with BIRT's premier data visualization technology. This allows AssetWorks clients to compile and analyze data within AiM, in order to monitor the status of their facilities by tracking Key Performance Indicators (KPIs).

“Having BIRT embedded within AiM is a huge benefit to the colleges and government agencies that make up our client base,” said Randy Walsh, Vice President of Professional Services at AssetWorks. “It is true for our government customers like the Wyoming School Facilities Commission and the State of Utah Division of Facilities Construction and Management, as well as our higher education customers like George Washington University. This integrated AiM and BIRT functionality enables our customers to utilize BIRT’s open source reports, as well as tap into Actuate’s commercial software and services when needed.”

Enhanced Flexibility, Reporting and Analytics for AssetWorks Customers

Actuate is the primary developer of BIRT technology, which is embedded in AssetWorks' AiM software. Leveraging Eclipse BIRT, AiM delivers out-of-the-box operational trend analysis and offers embedded analytics, providing asset or infrastructure-intensive organizations with critical analytical reports related to their asset life-cycle management, operations and maintenance, inventory control and space management.

Actuate's value-added BIRT-based products and support give AssetWorks customers a high degree of flexibility in meeting their reporting needs. BIRT has been customized to tightly integrate with AiM business processes and user interfaces so that clients can also tap into value-added commercial offerings from Actuate for increased EAM flexibility, organization-specific ad-hoc reporting, dashboarding, analytics and distribution capabilities.

BIRT Products From Actuate

Actuate offers value-added products that speed up BIRT development and implementations, automate and secure reporting, and provide interactive Ajax-based report creation and customization.

BIRT Resources for AssetWorks and AiM

Resources Sheet

End-user ad-hoc and interactive reporting products include:

- *BIRT Interactive Viewer*. A web-based report modification tool for end users.
- *BIRT Studio*. A web-based BIRT designer for end users.
- *BIRT 360*. Provides users with self-service operational and analytical dashboards.
- *BIRT Data Analyzer*. A zero-footprint, browser-based OLAP tool created for business users.
- *BIRT Spreadsheet*. Automates and centralizes spreadsheet productions, maintenance, archiving and security.
- *BIRT Mobile*. BIRT for mobile devices like the iPhone, iPad and Blackberry, allowing you to view BIRT content anywhere, anytime.

BIRT report development tools include:

- *BIRT Designer Professional*. A visual report development tool that supports Flash objects in reports.

BIRT deployment and automation tools include:

- *BIRT iServer*. A report server that secures, schedules and distributes reports and provides users with self-service capabilities; it supports On-Premises, Cloud, Software-as-a-Service and Platform-as-a-Service implementations.
- *Deployment Kit*. A lightweight J2EE report repository that provides a web front-end where users can browse, select and run reports on demand.

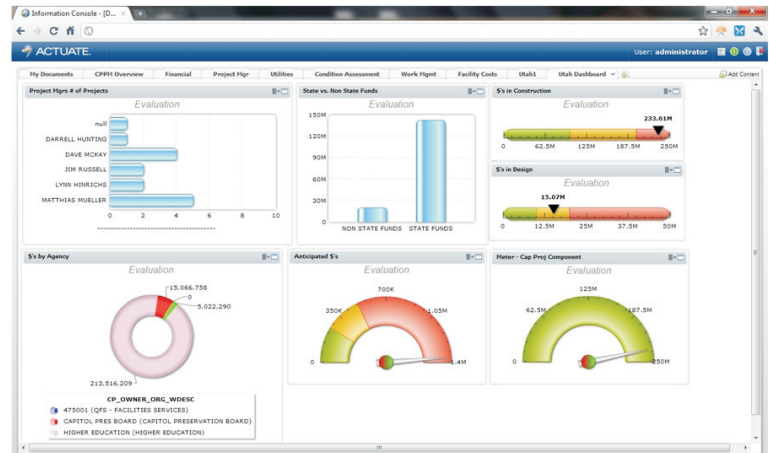

BIRT Exchange – Get the Most Out of BIRT

BIRT Exchange is the single largest collection of technical resources related to BIRT, allowing users to download Eclipse BIRT packages and free trials of Actuate's BIRT-based products.

AssetWorks customers can take advantage of the BIRT Exchange resources when building out enhanced reporting, analytics and Business Intelligence capabilities. Resources from BIRT Exchange include forums, downloads, online documentation and information on BIRT technical support.

BIRT Professional Services From Actuate

With predefined Professional Services packages to choose from, and the ability to define a custom engagement, BIRT consultants can help every organization make the most of BIRT.

Packaged service offerings include:

- *BIRT Deployment Strategy*. A five-day solution meant to give new customers or projects the right design and strategy, creating a solid foundation for their AiM-BIRT application.
- *BIRT Fast Start*. A 10-day engagement for the rapid development and deployment of an end-to-end BIRT-based solution, leveraging the knowledge of Actuate's team of experienced BIRT consultants.
- *BIRT Rapid Time To Value (RTTV)*. The BIRT RTTV solution enables new customers—or existing customers with new projects—to rapidly implement a robust BIRT-based Rich Information Application (RIA) from start to finish, all in as little as five weeks.
- *BIRT Training*. Two-day instructor-led classes on using BIRT, offered in person or through a live webinar format. Classes are available for experienced BIRT users as well as for those new to BIRT.

About Actuate Corporation

Actuate co-founded and leads Eclipse BIRT (Business Intelligence and Reporting Tools), an Eclipse Foundation open source project. Actuate delivers support and training for BIRT and a product line that builds on BIRT.
