

Beijing Automic Science and Technology Co., Ltd.

<http://www.automic.com.cn/en/>

Established in 2000, Beijing Automic Science and Technology Co., Ltd. (Automatic) is a joint-stock, high-tech enterprise dedicated to developing and constructing water affairs information management systems. It plans, integrates, develops and produces services around industrial application projects related to electric power, water conservancy, environmental protection, geology and ecology.

Automic uses BIRT within its Water Quality On-line Monitoring and Management System. The solution:

- Accurately and automatically monitors water quality, transmitting data remotely;
- Does online inquiry, analysis, calculation, graphics display and printing of water quality information;
- Automatically alerts users when set standards for monitoring aren't met.

BIRT Version 2.5 is used by Automic's external users to help monitor the data within the Water Quality system, including data around water levels.
