

# City of Winnipeg

<http://www.winnipeg.ca>

The City of Winnipeg – the capital of Manitoba, Canada – is using BIRT with IBM Maximo 7.1 as a reporting solution for the Maximo application. Custom reports are created from the out-of-the-box reports available from IBM Maximo, in order to show work order information, location cost information, etc.

An engineer for the City of Winnipeg commented that she learned to use the BIRT Designer in a very short amount of time without any training course. Publishing reports into the Maximo application has been easy – very few steps. According to the engineer, BIRT is also easy to navigate around even though there are so many features to navigate through.
