

CiviCRM

www.civicrm.org

CiviCRM is a free, libre and open source Constituent Relationship Management solution. It is web based, internationalized and designed specifically to meet the needs of advocacy, non-profit and non-governmental groups.

This powerful contact, fundraising and eCRM system allows organizations to record and manage information on their various constituents, including volunteers, activists, donors, employees, clients, vendors, etc. It also allows users to track and execute donations, transactions, conversations, events or any type of correspondence. It then stores it all in one easily-accessible and manageable source.
