

BIRT Resources for Cúram Software

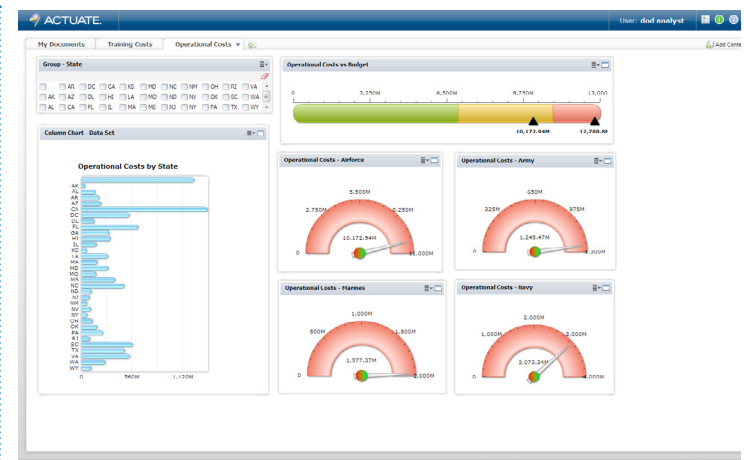

Resources Sheet

Actuate—the people behind BIRT—initiated and now co-leads the open source Eclipse™ Business Intelligence and Reporting Technology (BIRT) project, and provides value-added products to maximize BIRT implementations.

Cúram Business Application Suite™ comes integrated with Eclipse BIRT technology. BIRT serves as a flexible tool across the suite, providing a holistic view of processes across multi-program initiatives and government agencies. It makes for reduced time and risk, simplified maintenance update capabilities and higher user satisfaction, all with clearly identified outcomes.

Value-added BIRT products and services from Actuate provide an open, extensible reporting infrastructure, seamlessly integrating with the Cúram solution to provide embedded analytics and operational trend analysis for Cúram users.

An Actuate BIRT report for analyzing operational costs associated with programs.

An Actuate BIRT 360 self-service operational and analytical dashboard for Cúram Software customers to get the most out of their embedded Eclipse™ BIRT reporting engine.

BIRT Products From Actuate

Actuate offers value-added products that speed up BIRT development and implementations, automate and secure reporting, and provide interactive Ajax-based report creation and customization.

End-user ad-hoc and interactive reporting products include:

- **BIRT Interactive Viewer.** A web-based report modification tool for end users.
- **BIRT Studio.** A web-based BIRT interface for end users.
- **BIRT 360.** Provides users with self-service operational and analytical dashboards.
- **BIRT Data Analyzer.** A zero-footprint, browser-based OLAP tool created for business users.
- **BIRT Spreadsheet.** Automates and centralizes spreadsheet production, maintenance, archiving and security.
- **BIRT Mobile.** BIRT for mobile devices such as the iPhone™, iPad™ and Blackberry®, allowing users to view BIRT content anywhere, anytime.

BIRT Resources for Cúram Software

BIRT report development tools include:

- *BIRT Designer Professional*. A visual report development tool that supports Flash® objects in reports.

BIRT deployment and automation tools include:

- *BIRT iServer*. A report server that secures, schedules and distributes reports; it supports On-Premises, Cloud, Software-as-a-Service and Platform-as-a-Service implementations.
- *Deployment Kit*. A lightweight J2EE report repository that provides a web front-end where users can browse, select and run reports on demand.

Enhanced Flexibility, Reporting and Analytics for Cúram Software Customers

Actuate is the primary developer of BIRT reporting technology, which is embedded in Cúram Software. Leveraging Eclipse BIRT, Cúram Software delivers out-of-the-box operational trend analysis and offers embedded analytics, providing case workers, supervisors and executives with critical analytical reports within the context of a Cúram case. Actuate's value-added BIRT-based products and support give Cúram customers a high degree of flexibility in meeting their reporting needs while maintaining existing investments.

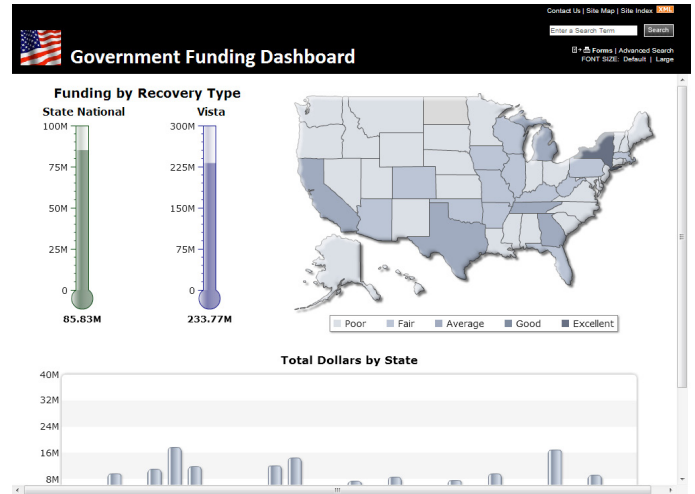

BIRT Exchange – Get the Most Out of BIRT

BIRT Exchange is the single largest collection of technical resources related to BIRT, allowing users of BIRT technology to download Eclipse BIRT packages and free trials of Actuate's BIRT-based product line.

Cúram Software customers can take advantage of the BIRT Exchange resources when building out enhanced reporting, analytics and Business Intelligence capabilities in their Cúram business solution. Resources from BIRT Exchange include forums, downloads, online documentation and information on BIRT technical support.

An Actuate BIRT Dashboard with interactive and drill-down capabilities. Muted colors are for the sight impaired.

BIRT Professional Services From Actuate

With predefined Professional Services packages to choose from, and the ability to define a custom engagement, BIRT consultants can help every organization make the most of BIRT.

Packaged service offerings include:

- *BIRT Deployment Strategy*. A five-day solution designed to provide new customers or projects with the right design and strategy, creating a solid foundation for their Cúram-BIRT application.
- *BIRT Fast Start*. A 10-day engagement for the rapid development and deployment of an end-to-end BIRT-based solution, leveraging the knowledge of Actuate's team of experienced BIRT consultants.
- *BIRT Rapid Time-to-Value (RTTV) Package*. The BIRT RTTV package enables new customers—or existing customers with new projects—to rapidly implement a robust BIRT-based Rich Information Application (RIA) from start to finish, all in as little as five weeks.
- *BIRT Training*. Two-day instructor-led classes on using BIRT, offered in person or through a live webinar format. Classes are available for experienced BIRT users as well as for those new to BIRT.

About Actuate Corporation

Actuate co-founded and leads Eclipse BIRT (Business Intelligence and Reporting Tools), an Eclipse Foundation open source project. Actuate delivers support and training for BIRT and a product line that builds on BIRT.
