

# Emforium Group Inc.

[www.allinsoftware.com](http://www.allinsoftware.com)

Founded in 1996, Emforium Group Inc. has evolved into a premium provider of on-demand, integrated business management software for small- and medium-sized retailers. Emforium Group's ALL-IN Software™ manages all key business operations in a single web-based system, including Client Relationship Management (CRM), sales order fulfillment, inventory management, business reporting, website management and integrated business email.

Emforium uses BIRT to generate reports for end-product users and in-house users. Reports are not limited to any particular area; the goal is to generate reports that suit all the needs of Emforium's customers. The database that data is being pulled from is comprehensive and BIRT is expected to report on the full gamut of corporate information.
