

Fundtech Ltd.

www.fundtech.com

Fundtech – originally founded in 1993 – is a leading provider of software products and services to banks worldwide, developing transaction banking solutions that automate activities such as: payments, cash management, settlement, and liquidity management. The company has over 1,000 clients worldwide, including some of the world’s leading banks.

Fundtech uses BIRT to provide necessary information to its external clients, fetching data from an Oracle database and generating PDF, XLS and HTML reports. The company has found BIRT to be a better option than Oracle reports and likes that it’s so simple to use.
