

# Ilaw Konsult Corporation

[www.i-konsultcorp.com](http://www.i-konsultcorp.com)

Ilaw Konsult Corporation, or simply I-Konsult, is a Filipino-owned company engaged in physical asset, risk and maintenance management consulting. The company was formed and conceptualized by a group of young professionals coming from business, engineering and academics. Their core mission is to provide consulting services anchored on collective international and local best practices, and to further broaden knowledge about the strategic values of operational risk management, physical asset management and maintenance management in any organization in the Philippines and the Asia Pacific region.

I-Konsult uses BIRT for IBM Maximo reporting requirements, in order to help better serve their clients. Some of the reporting capabilities include custom reporting, categorizing operational and Computerized Maintenance Management System (CMMS) data, etc. I-Konsult especially likes BIRT for its flexibility, multi-functionality and scalability.
