

J.H. Lynch & Sons

www.jhlynch.com

A third-generation, family-owned firm with over 50 years of experience, J.H. Lynch & Sons is a development and construction company that services Southeastern New England, providing construction and project management services to construction managers, site developers and private- and public-sector contractors. They also manufacture construction materials, including asphalt, gravel, stone, sand, loam and concrete.

Eclipse BIRT 2.6.1 is used within J.H. Lynch & Sons' Lynch Schedule solution to query data from their IBM i database and generate reports with employee schedules and timesheets in PDF files. It's accessed by internal users, who like that they can quickly create custom reports, and can change report parameters as needed. They can also quickly launch the application in a Windows environment, using Apache Tomcat.
