Mphasis – an HP company – delivers Applications services, Infrastructure services, and Business Process Outsourcing (BPO) services globally, with the aim of improving business performance for its clients. Its experienced global leadership team drives service delivery through the next-generation global delivery model, assisting clients in a range of sectors, including: Financial Services, Manufacturing, Communications, Media and Entertainment, Healthcare and Life Sciences, Transportation and Logistics, Retail and Consumer Packaged Goods, Energy and Utilities, and Government.

The company uses BIRT for its Inventory Tracking Tool (ITT) Mobile Equipment, used by the General Motors (GM) Worldwide Facilities Group to manage all aspects of GM's mobile equipment fleet, including fork trucks, cranes and scooters/carts. This includes acquisition, maintenance, inventory, fleet rightsizing, equipment transfer, lease payment, and disposal of all GM-owned, leased, and rented mobile-powered equipment and related accessories such as batteries and chargers. ITT was developed to support these business functions.

Internal employees of GM Worldwide Facilities Group use BIRT within ITT and like its user friendliness and ease of customization; it can generate reports quickly and even the most complex of reports are easy to create.
