

Nuxeo

www.nuxeo.com

Founded in 2000, Nuxeo is one of a handful of pioneering open-source vendors responsible for the disruptive wave that is dramatically changing today's software industry. Nuxeo focuses its energy on providing innovative yet pragmatic Enterprise Content Management (ECM) software that specifically addresses the full spectrum of today's content-driven customers' needs.

The BIRT driver for Nuxeo enables BIRT to be used as a reporting engine for the Nuxeo Content Repository. It provides an easy way to query the repository and create a report from the results. Thanks to BIRT, reports can be run inside Eclipse or as servlets on the server side.
