

# Rocket Software

www.aldon.com

Rocket Software is a global software development firm and the developer of Aldon Lifecycle Manager, which automatically tracks, accelerates and streamlines the management of software and maintenance processes and workflows. The company has been providing Application Lifecycle Management (ALM) for IT for more than 30 years, with over 1,300 customers worldwide, including over 70 Fortune 100 companies.

Rocket uses Eclipse BIRT 2.5.2.1 within Aldon Lifecycle Manager to report on artifacts stored in the system. Aldon Lifecycle Manager allows client managers, administrators and decision makers at sizeable software organizations to generate reports on demand. BIRT allows them to produce reports using large data sets.
