

Subex

www.subexworld.com

Subex is the company behind ROC Revenue Assurance, a complete revenue-assurance solution designed to take on critical challenges across the entire revenue chain. It offers a set of pre-configured solution templates to address revenue-assurance challenges inherent to individual service verticals, including Wireless, Fixed, Cable MSPs, and MVNOs. These solution templates address revenue-assurance issues across multiple functional areas, such as service fulfillment, usage integrity, retail billing, interconnect/wholesale billing and content settlement. By using the templates – which can be easily reconfigured or remodeled to meet changing business requirements – customers dramatically reduce the time required to implement or extend the coverage of their revenue-assurance practices. ROC Revenue Assurance also helps detect potential revenue loss, while helping operators investigate, diagnose and recover those revenues.

BIRT is used for report generation within ROC Revenue Assurance. It allows the solution's end users to create reports exactly the way they want, without the need for complicated code. Because BIRT is so easy to utilize, even beginners have no problem with it – and the company likes the fact that changes are implemented by modifying BIRT design files, rather than by changing the code.
